15.03 Placement of Traffic Control Devices. When official traffic control devices are required to be erected by this Chapter or by law it shall be the duty of the Village of Johnsburg Public Works Department, or other person designated by the Board of Trustees, to cause suitable devices to be erected in such areas according to the Manual on Uniform Traffic Control Devices, if not erected by the State Department of Public Works and Building.

15.04 Lights on Parked Vehicles. Whenever a vehicle is parked or stopped on a street during the times between one-half hour (30 minutes) after sunset and one-half hour (30 minutes) before sunrise, there shall be displayed upon such vehicle one or more lamps projecting a white or amber light visible under normal atmospheric conditions from a distance of 500 feet to the front of such vehicle and projecting a red light visible under like conditions from a distance of 500 feet to the rear, except that such parking light or lights need not be displayed upon any vehicle stopped or parked in accordance with other provisions of this Chapter upon any street designated by the Village Clerk where there is sufficient light to reveal any person within a distance of 200 feet upon any street.

15.05 Parking during Snowfall. No person shall allow any vehicle to be parked or remain standing on any street or any right-of-way line of any street in the Village between November 1 in any calendar year and April 1 in the following calendar year during any time of the day or night when there shall be a snowfall in excess of two inches, or so long as there shall be snow remaining upon the aforesaid streets or right-of-way of said streets in excess of two inches as determined by the Public Works Foreman; any person having parked or left standing a vehicle on any street or within the right-of-way of any street of the Village during the aforesaid calendar dates and prior to a snowfall of two inches shall be required to remove said vehicle immediately upon a snowfall

of two inches. Failure to so remove any such vehicle shall constitute a violation of this section and such vehicle will be towed at the owner's expense.

15.06 Seasonal Weight Limits on Streets.

- A. Determination of Limits. The Village Engineer shall determine the temporary seasonal and permanent gross weight operating limitations per axle of the various streets and roadways in the Village, basing the same upon foundation, base, materials, type of construction, seasonal weather conditions, seasonal frost levels, ground water tables and general conditions and all other factors involved in the construction and maintenance of such streets and roadways.
- B. Schedule. The Village Engineer shall state and determine a temporary seasonal and a permanent safe gross weight load limitation per axle for all vehicular traffic using the streets and roadways, and shall file a schedule of the temporary seasonal and permanent safe gross weight limitations per axle for each street and roadway with the Village Clerk.
- C. Posting Limits. The Village Engineer shall cause the gross weight limitations per axle to be posted in prominent places in and on the streets and roadways. All such gross weight limits per axle as so determined and posted in and on the streets and roadways shall be the various gross weight limits per axle for all types of vehicles traveling in, on, upon and over the separate streets and roadways of the Village. Each separate street and roadway in the Village shall be restricted to vehicular traffic including passenger cars, motor trucks and all other types of vehicles, which shall have a gross weight per axle not exceeding the amount determined as the various maximum safe gross weight limits per axle for such separate street and roadway and posted in and on the street and roadway according to the Manual on Uniform Traffic Control Devices, as hereinbefore set forth.

- F. Weighing Vehicles. Any police officer having reason to believe that the weight of a vehicle and load is unlawful shall require the driver to stop and submit to a weighing of the same either by means of a portable or stationary scale. If such scales are not available at the place where such vehicle is stopped, the police officer shall require that such vehicle be driven to the nearest public scales.

- G. Reducing Load. Whenever an officer upon weighing a vehicle and load, as above provided, determines that the weight is unlawful, such officer shall require the driver to stop the vehicle in a suitable place and remain standing until such portion of the load is removed as may be necessary to reduce the gross weight of such vehicle to such limit as permitted under this section and shall forthwith arrest the driver. All material so unloaded shall be cared for by the owner or operator of such vehicle at the risk of such owner or operator.

15.07 All Night Parking. When signs are erected at entrances of highways into the Village giving notice thereof, no person, firm or corporation shall allow any vehicle to be parked or remain standing on any street or any right-of-way line of said street in the Village for a period of more than 30 minutes between the hours of 2 a.m. and 6 a.m. on any day, except physicians on emergency call.
